

SCIENCE FAIR RESEARCH PAPER RUBRIC

Name _____

		4 points	3 points	2 points	0 points	Score
Introduction	There is a clear introduction with the leading question and hypothesis included.					
Science behind the topic	Why the science takes place in your topic. For example, why maglev trains work. There is a thorough explanation of the principals that make your topic work.					
Real life applications of your topic	Student cites two or more real life applications e.g (instant heat packs, CSI etc.)					
Depth / mastery	Student shows mastery of the topic which means that he/she fully understands the work about to be done.					
Originality/ plagiarism	Student does not copy directly from sources but uses his/her own original language. Acts of plagiarism will severely effect the grade of the students paper and can result in a zero.					
References	At least three original references not including “google” or “sciencebuddies.org”.					
References Format	References are in the proper format as outlined by reference format sheet.					
Cover page	All items are included on the cover page: students name(s), title (topic), partners, class period and date.					

Grammar	Student uses correct spelling, grammar and full sentences.					
Neatness	The research paper is <u>typed</u> with Times New Roman, 12 point font, double spaced and is neat and legible. <u>No credit will be given to hand written papers.</u>					
Length	The paper is at least 2 full pages long. Reference list and cover page does not count towards paper length.
